Websters Dictionary

>MirrorImage **re•search** < enables you to research items on-screen, giving you immediate access to information like returned items, customer statements, etc. The results can be displayed on-screen, printed, faxed or emailed - right from your desktop. The **re•search** module is fully integrated with your core banking application.

**re•search** takes advantage of the latest database technology for fast access and highly customizable queries, such as NSFlookups, closed accounts, etc.

In **re•search** items can be displayed sorted by query criteria such as item type (deposit ticket, on-us check, foreign item, etc.) or as complete transactions.

**re•search** is available as thick client (PC based) and thin client (browser based).

**re•search** allows you to view signature cards and customer photo ID while looking at a check image.

The **re•search** module also features return item processing capabilities.
