# Intelligent Fields

Many software packages can scan your checks but that's only half the JOB!

You need the account number and maybe the name or more to finish the JOB.

Intelligent Fields from Jaguar Software will finish the job by automatically completing the fields you need for posting your payments.

Data you need!

Intelligent Fields PROVIDES!

Intelligent Fields:
Available now in all Jaguar check scanning products.

Intelligent Fields – the newest in advanced features from Jaguar Software allows the user to configure intelligently populated fields based on previously entered data.

The **Intelligent Fields** feature supports multiple fields (over 20), free form field naming, customized field lengths, multiple data types, customized memory span, and many other parameters.
